

# ReadQueue Test Document

Page 1 of 3

Welcome to the ReadQueue Group Reading Application!

This is a test document to demonstrate the PDF viewing functionality of the web application.

Features:

- Join reading queues with sub-groups
  - Take turns reading documents
  - Auto-skip timer for inactive readers
- WebRTC audio for live reading sessions

# How It Works

Page 2 of 3

1. Select or create a reading group
2. Enter your name and join the queue
3. Wait for your turn (position 1)
4. When it's your turn:
  - Click 'Start Reading' to begin
  - Click 'Skip' to pass your turn
  - Click 'Finish' when done

The auto-skip timer ensures smooth transitions  
if a reader is unavailable.

# Admin Features

Page 3 of 3

Admin Portal (PIN: 2525):

- Upload PDFs to the library
- Date-based PDF loading (MMDDYYYY\_name.pdf)
  - Random folder for fallback PDFs
    - Manage sub-groups
    - View and clear queues
    - Force reload documents

Thank you for using ReadQueue!
